PRODUCT BROCHURE
EXPANDABLE CONTAINER HOUSE

拓展箱

Expandable container house

GOOD AND BEAUTIFUL LIFE

可以折叠移动的住宅

A foldable and mobile residence

相比于普通集装箱房

Compared to regular container house

面积更大, 空间更大

Larger area, larger space

一套完整的住宅

A complete residence

相比于传统建筑

Compared to traditional residence

无需地基

No foundation required

安装极快

Installation is extremely fast

成本极低

Extremely low cost

可以折叠移动

Can be folded and moved

多彩外观

GOOD AND BEAUTIFUL LIFE

更大的面积，更大的空间 Larger area, larger space

一个普通单箱
A single regular container house

一个拓展箱 E20
A expandable container house E20

● **E20**
Container loading capacity: 2Unit/40HQ

可选20FT/40FT
Optional 20FT/40FT

● **E40**
Container loading capacity: 1Unit/40HQ

给您一个温馨的家
Give you a cozy home

可以折叠移动的家

A home that can be folded and moved

将前后墙板向侧墙折叠
Fold the front and rear wall panels towards the side walls

将侧墙板向地板折叠
Fold the side wall panel towards the floor

将地板向上折叠
Fold the floor upwards

将屋顶板向下折叠
Fold down the roof panel

折叠完成
Folding finish

...

GOOD AND BEAUTIFUL LIFE

无地基/地形需求，到哪都能用

No foundation/ topography requirements, can be used anywhere

无需打桩，只需要一块平整土地
No need for piling, **only a flat piece of land is needed**

可在沙滩使用
Can be used on the beach

可在草原使用
Can be used on the grassland

可在山地使用
Can be used on the upland

E20/E40可以灵活分割室内空间，有多种多样的户型方案。联系我们，告诉我们您的设计想法，我们帮您实现。

The E20/E40 can flexibly divide indoor spaces and offers a variety of layout options. Contact us, tell us your design ideas, and we will help you implement them.

镀锌钢框架结构

Galvanized steel frame structure

E20/E40均采用镀锌钢材料打造，各零部件之间焊接在一起，整体结构强度偏高，使用寿命可达25年。使用130mm镀锌折叠合页，折叠顺畅耐用。

E20/E40 are both made of galvanized steel material, with each component welded together, resulting in a relatively high overall structural strength and a service life of up to 25 years. Using 130mm galvanized folding hinges, the folding is smooth and durable.

保温隔热墙板

Thermal insulation wall panel

E20/E40 标准款采用中间采用75mmEPS，两翼50mmEPS夹芯墙板，热导率为0.03~0.04W/(m*K)，具备良好的保温隔热性能。

The E20/E40 standard model adopts 75mm EPS in the middle and 50mm EPS sandwich wall panels on both wings, with a thermal conductivity of 0.03-0.04W/(m * K) and good insulation performance.

物理结构防水 Structural waterproofing

E20/E40 两翼屋顶均内嵌入中间屋顶的收边折口内，使屋顶的雨水可以直接向两翼排水，由两翼排出室外。

The two wing roofs of E20/E40 are embedded in the edge folding openings of the middle roof, allowing rainwater from the roof to be directly drained to both wings and discharged from the outside.

独立管道

Independent water pipe

卫生间使用PVC水管，按照日常用水不同，独立布置污水管及废水管，减少对环境的污染。

The bathroom uses PVC water pipes, and sewage and wastewater pipes are independently arranged according to different daily water usage to reduce environmental pollution.

家电电路服务 home appliance circuit services

成品拓展箱内置水电线路，所有电路均暗藏于墙地板内，没有裸露电线，给常用家电提供电力供应的同时，保证室内天花完整简洁美观。

The finished expandable container house is equipped with built-in water and electricity lines, and all circuits are hidden inside the walls and floors without exposed wires, providing power supply for commonly used household appliances while ensuring the integrity, simplicity, and aesthetics of the indoor ceiling.

E20

Size: 5900L*6320W*2480H(mm)

Container loading capacity: 2Unit/40HQ

E40

Size: 11800L*6320W*2480H(mm)

Container loading capacity: 1Unit/40HQ

横梁 Beam	Q235B镀锌钢 Q235B Galvanized Steel	80*100*2.5D
立柱 Column	镀锌钢 Galvanized Steel	150*150*2.5D
檩条 Purlin	Q235B镀锌钢 Q235B Galvanized Steel	40*60*1.5D
墙板框架 Wall panel frame	镀锌钢 Galvanized Steel	40*80*1.5D 40*60*1.5D
合页 Hinge	镀锌钢 Galvanized Steel	130mm
墙板、屋面 Wall panel, Roof	EPS sandwich wall panel	50mm
中间墙板 Middle wall panel	EPS sandwich wall panel	75mm
地板 Floor	MGO board Bamboo and wood fiber board	
吊顶板 Ceiling	压型扣板 Compression buckle plate	20mm
